

# Blue Smoke Control®

A Division of Butler-Justice, Inc.

## PATENTED TECHNOLOGY, EXPERT DESIGN AND INSTALLATION

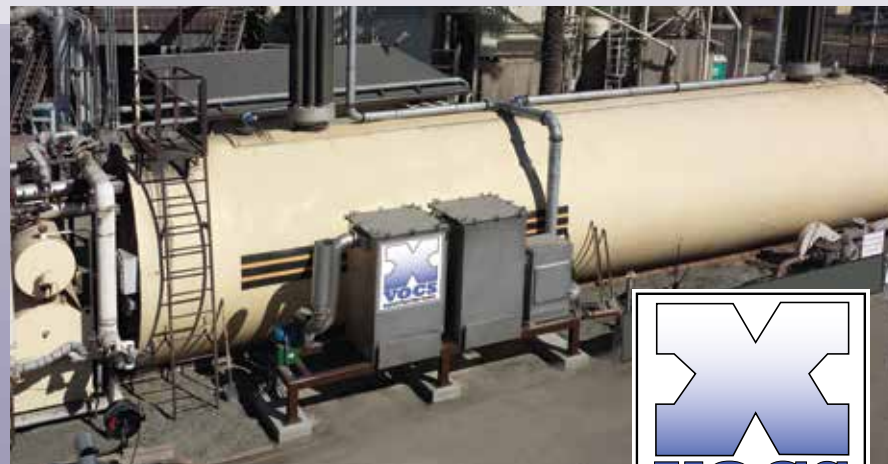

In the world of hot mix asphalt production, we're probably best known for our breakthrough Blue Smoke Control technology, now in place in hundreds of asphalt plants throughout California, the continental United States, Hawaii, Alaska, Australia and Mexico.

This Best Available Control Technology ("BACT") has now been paired with our new Odor Control ("X-VOCS™") System to provide a one-two punch in eliminating most of the blue smoke and odor pollution created in asphalt production.

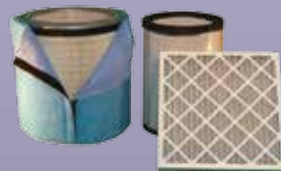

### When You Want Your Plant to Disappear Environmentally

Our Blue Smoke Control Division's popular and effective collectors provide the ideal solution to asphalt plant pollution control. We design systems for virtually every asphalt plant configuration. If "Blue Smoke" is an issue in your plant, we have cost-effective solutions.

No longer do you have to put up with odor and VOC's created in the asphalt production process. Our latest solution, the "X-VOCS™" puts an end to plant odor and VOC issues once and for all.

Our filters are a key part of our "BACT" (Best Available Control Technology).

## SERVICE AND TECH SUPPORT – READY AND COMPETENT

We pride ourselves in servicing everything we sell. Here's what our clients say:

*"Butler-Justice gives us the finest support. Well beyond expectations for response time and quality of work."*

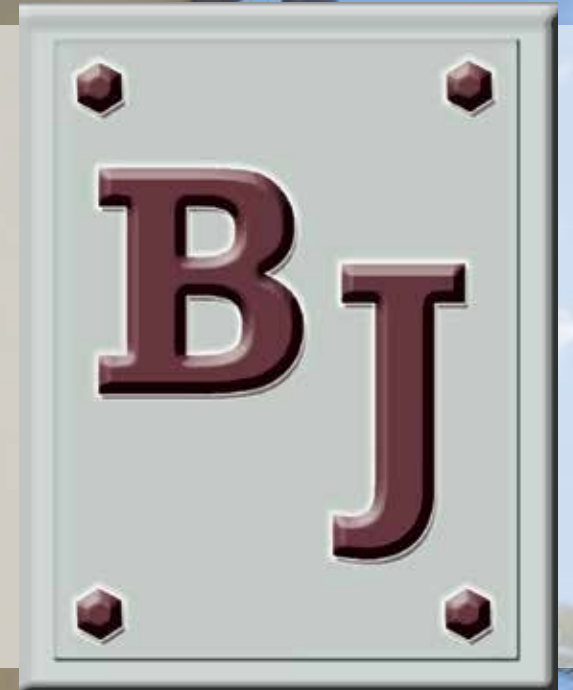

*"When you want systems and products that really fit the application, you call Butler-Justice. They have the experience and knowhow to give you exactly what you need at the best price and service!"*
